

This is a general specification leaflet ; for specific applications not covered herein, contact Suntec.

The SUNTEC J oil pump is for medium capacity oil burners from 400 to 3000kW. It incorporates a pressure regulating valve and is available with or without cut-off function.

COMPATIBILITY

- Fuel oil #4 and lighter.
- One or two-pipe system.
- Normally associated with in-line solenoid valve.

PUMP OPERATING PRINCIPLE

The gear set draws oil from the tank through the built-in filter and transfers it to the valve that regulates the oil pressure to the nozzle line. All oil that does not go through the nozzle line will be dumped through the valve back to the return line in two pipe installation or, if it is a one-pipe installation, back to the suction port in the gear-set. In that case, the by-pass plug must be removed from the return port and the return port sealed by steel plug and washer.

Models 1000 & 1001, the valve also has a cut-off function as follows :

- During starting period when the gear-set speed is increasing, all the oil passes through a special flat on the piston, back to the return. Once the speed reaches a certain value and the flow can no longer pass through this flat, then the pressure increases rapidly overcoming the valve spring force and opens the valve.
- During the stop sequence, the gear-set speed slows down and the valve closes when the gear-set capacity is lower than the flat flow.

The cut-on and cut-off speeds depend on the gear-set size and set pressure. Models 1002 & 1003 have no cut-off function. Cut-off must be provided by an external solenoid valve.

Bleed :

Bleeding in two pipe operation is automatic, but it may be accelerated by loosening the plug in a pressure gauge port.

In one pipe operation, a pressure port must be opened to bleed the system.

PUMP IDENTIFICATION

(Not all model combinations are available. Consult your Suntec representative)

J : Pressure regulation

Gear set capacity (see pump capacity curves)

Strainer

Shaft rotation and nozzle location (seen from shaft end)

A : clockwise rotation/ right hand nozzle.

B : clockwise rotation/ left hand nozzle.

C : anti clockwise rotation/ left hand nozzle.

D : anti clockwise rotation/ right hand nozzle.

Pressure range

1000 : conical connection threads cut-off function

1001 : cylindrical connection threads cut-off function

1002 : cylindrical connection threads by-pass nozzle, no cut-off function

1003 : conical connection threads by-pass nozzle, no cut-off function

Revision number

Installation

P : by-pass plug installed in return port for two-pipe operation

M : without by-pass plug; return plugged for one-pipe operation

J 6 P A C 1000 8 M

TECHNICAL DATA

General

Mounting	Flange mounting according to EN 225.	
	Models 1000/1003	Models 1001/1002
Connection threads	Conical	Cylindrical (according to ISO 228/1)
Inlet and return	1/4 NPTF	G 1/2
Nozzle outlet	1/8 NPTF	G 1/4
Pressure gauge port	1/8 NPSF	G 1/8
Vacuum gauge port	1/4 NPTF	G 1/2
Valve function	Pressure regulating and cut-off (except for 1002 and 1003 models).	
Strainer	Open area	Opening size
P :	97cm ²	170µm
N :	45cm ²	550µm
Shaft	7/16" (Ø 0.4365" - flat 0.396").	
By-pass plug	Inserted in return port for 2 pipe system; to be removed with a 3/16" Allen key for 1 pipe system.	
Weight	8.8 IBs	
Certified		

Hydraulic data

Standard pressure range	Delivery pressure setting
B : 100 - 200 psi	100 psi
C : 150 - 300 psi	175 psi
K : 200 - 435 psi	290 psi (for J1000 and J1001)
150 - 435 psi	175 psi (for J1002 and J1003)
Low pressure range :	Delivery pressure setting
A : 20 - 40 psi	40 psi
D : 40 - 80 psi	80 psi
F : 10 - 20 psi	10 psi
Operating viscosity	2 - 75 mm ² /s (cSt) for J4/J6
Oil temperature	32 - 194°F in the pump.
Inlet pressure	10 psi max (NFPA limits pressures to 3 psi max).
Return pressure	10 psi max (NFPA limits pressures to 3 psi max).
Suction height	6,5 psi max. vacuum to prevent air separation from oil.
Rated speed	3600 rpm max.
Torque (@ 45 rpm)	0,30 N.m

Pump capacity

Data shown take into account a wear margin.
Do not oversize the pump when selecting the gear capacity

Power consumption

PUMP DIMENSIONS

Example shows "C" rotation and nozzle outlet.

- 1 Suction or vacuum gauge port
- 2 Return and internal by-pass plug
- 3 Nozzle outlet
- 4 Pressure gauge port
- 5 Vacuum gauge port or suction
- 6 Pressure adjustment
